INTEGRATED PEST MANAGEMENT PROGRAM

The key to PV Pest's success is the process we use to determine the most appropriate IPM program and treatment-and-monitoring strategy for each facility. PV Pest's technicians follow a seven-step process for each and every client:

Seven Key Points:

1. Environment Inspection

2. Facility Layout Analysis

3. Pest Identification

4. Customized Treatment Techniques

5. Sanitation and Hygiene Consultations

6. Treatment Strategies

7. Ongoing Monitoring & Maintenance
